THE U.K. AND IT'S OUTDATED ANIMAL TESTING LAWS AND LEGISLATION

Is the government breaking the law?

Why is there no checking process to ensure compliance with the act as stated for replacement where alternatives already exist and are at regulatory standards?

Why is the government not listening to the experts, various organisations and the public to sign the EDM 278 which calls for a rigorous public scientific hearing on animal experiments, judged by independent experts from the relevant fields of science?

NAT DATABASE - VALIDATED METHODS

Why is there no mechanism for a multi-year project licence for review and checking that the alternatives are being applied as they reach regulatory standards?

Why are no actions recorded of any penalties for non-compliance in the use of animals in procedures where alternatives already exist?

Non animal methods - why are they not compulsory?

NATION OF DOG LOVERS AND WE STILL EXPERIMENT ON THEM

Why is the government dealing with companies that have a criminal history?

Is the standard of care at MBR Acres acceptable?

Has using animals ever been scientifically validated?

CAN YOU PLEASE ANSWER THE BELOW QUESTIONS?

THE COST TO HUMAN HEALTH AND OUR POOR N.H.S

Should the UK direct funding towards methods of research which are human relevant?

Should the NHS pick up the Adverse Drug Reactions bill or should this be passed onto the Pharmaceutical companies?

We are advocating for MPs to sign the EDM278.

The EDM278 calls for the Government to mandate a rigorous public scientific hearing on animal experiments, to judge false claims that animal testing 'saves human lives'. This hearing will be judged by truly independent experts from the relevant fields of science, including clinical medicine, complexity science, chaos theory, evolutionary biology, clinical research, drug development, philosophy of science and basic research. **WILL YOU PLEASE SIGN IT?**
